

City Engineering

By Alli-Smith Mayowa

ABSTRACT

A comprehensive treatise on the terraforming and building of a new city from scratch with city wide symmetry and architectural designs inclusive.

OUTLINE

- 1). 3 Dimensional city plan multiple 3 dimensional sinusoidal waves for storey buildings.
- 2). Each Building Design, Architecture and Implementation Specified.
- 3). Glass with friction embedded walkways 5 lanes with human height golden lamp holders.
- 4). Pebble like roads.
- 5). Airports on rooftops of skyscraper points, with stalling airplanes.
- 6). Interior Design Of Buildings, Crystal Aging Implemented.

7). City manufacturing via total machine automaton devices.

8). Refurbishment plans included.

9). Conclusion.

10). References.
